## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification fails to disclose the numerical value of the angle between the tip and the teeth of the ratchet and specifically how the angle in combination with the housing structure permits the limiting torque to be determined. It is also not disclosed how the angle was determined. Once the limiting torque is determined how does this structure limit the torque?

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
